To Whom It May Concern:

Recommendation Letter for Chia Wei Song, Andre

Chia Wei Song, Andre participated in the University Immersion Programme between Nanyang Polytechnic and Nanyang Technological University for 2 months. Throughout the 8 weeks, Andre was consistent towards the targets he was assigned. In the first 2 weeks of the program, he was very enthusiastic and inquisitive while he gained knowledge about the software vulnerabilities and various metrics considered in NVD database which he further utilized to do data review and correctness of 1000 CVE's and library and version mappings.

Andre consistently demonstrated a proactive nature and had the curiosity to ask questions from time to time. He had the opportunity to develop his programming skills while working on languages like Javascript, python and some practical understanding on asynchronous task management.

We admired Andre's research skills, especially when he underwent his last task of predicting library from vulnerability description using fuzzing. This concept was fairly new to him but he never hesitated when he got stuck and asked for help from people working in the similar field to get the work done quickly.

We would recommend Andre to whichever position he might be applying for. If you require further information, please feel free to contact me at yangliu@ntu.edu.sg.

Thank you.

Yours faithfully,

Yang Liu
